Portfolio: r-tulika.me

PROFILE

3+ years of experience in **IIoT** and full-stack development with **Angular**, **.NET**, and **NestJS**; contributions to **5+ production applications** (audako, Inframan, IoT-2050 Configurator). IT specialist in application development, graduation expected in spring 2027 (shortened apprenticeship). Open-source maintainer (elementar-rt); own infrastructure with **Kubernetes** and CI/CD.

PROFESSIONAL EXPERIENCE

narz systems GmbH & Co.KG

Professional training - IT specialist: Application development

August 2024 - Now

- **audako IIoT platform** (HMI, SCADA, IoT, energy management): co-development of cloud and on-premise solutions for process control systems — used in **1,500+ projects** and via system partners in **25 countries**.
- **~70% of the platform** converted to responsive layouts; usability and user-friendliness improved through consistent in-app linking.
- **120+ components** migrated from Material Design 2 to Material Design 3 and converted to Signals and signal-based forms (Angular).
- **200+ components** unified and duplicates eliminated; **5 widgets** developed for displaying and digitalizing IIoT information.
- **200+ tickets** handled independently: analysis, bug fixing, feature development, deployment.
- **Inframan** (smart IIoT device management, Angular) co-developed; technical documentation and customer training; work in an **ISO 27001**-certified environment (IT/OT security).

IoT-2050 Configurator (IIoT Configurator)

Independently owned project

- **Full-stack solo project:** configuration and diagnosis solution for industrial IoT gateways (Siemens SIMATIC IOT2050) — Angular, Angular Material (MD3), NestJS, REST APIs.
- **End-to-end ownership:** from requirements analysis through architecture and implementation to deployment.
- **120 min → 10 min:** configuration time per device reduced by over 90%.
- **100+ parameters** configurable, **40 diagnostic checks** automated (device state, connectivity, configuration validation).
- **300+ customer projects:** in productive use.

Short-term work

March - April 2024

- **IoT device project** updated with Angular, Angular Material, NestJS, and Express; new frontend features and backend optimization with REST APIs.
- **Debian** installed on specific IoT devices and operating system settings pre-configured for the industrial environment (security and network parameters).

Internship

July - September 2023

- **6 weeks** focused on software development: programming and project management with Angular, Angular Material, Tailwind CSS, MongoDB.
-

SKILLS

- **Programming Languages:** TypeScript, JavaScript, Python, Dart, C#, Java.
 - **Frontend:** Angular, Angular Material, RxJS, Tailwind CSS, SCSS/CSS, HTML5, AmCharts, Ionic, Flutter.
 - **Backend:** .NET, NestJS, Node.js, Express.js, Spring Boot, REST API, MongoDB, PostgreSQL, Keycloak.
 - **DevOps & Infrastructure:** Kubernetes (RKE2/Rancher), Docker, Helm, Jenkins, nginx, Git/GitHub, Linux (Debian, Fedora).
 - **Others:** Networking fundamentals (CCNA), IT/OT security fundamentals, UI/UX (Material Design 3, style guides, Figma), Telegram chatbot development.
-

OPEN SOURCE & PROJECTS

elementar-rt — Maintainer & Developer

github.com/randrost/elementar-rt

- **Open-source library** of Angular UI components and admin panel based on Angular Material 3 and Tailwind CSS.
- **Active maintenance:** new components, bug fixes, upgrades to current Angular versions.
- **Admin SaaS template** with live demo: admin.elementar-rt.r-tulika.me

Homelab & Self-Hosting

- **Kubernetes cluster** (Rancher/RKE2) built and operated: cert-manager, ingress, persistent storage, self-hosted container registry.
- **CI/CD with Jenkins** (Docker sidecar); declarative management with Helm charts and manifests.

Portfolio — r-tulika.me

- **Multilingual portfolio** built with Angular 20, SCSS, and Angular Material; self-hosted on my own Kubernetes cluster.
-

CERTIFICATES

- **CCNA: Introduction to Networks** — Cisco Networking Academy (Theodor-Litt-Schule Gießen), June 2026.
-

EDUCATION

Technical college

GPA: 2

Occupation: IT Specialist – Application Development
Theodor-Litt-Schule, Gießen 35390

Secondary School

GPA: 1.9

Gymnasium
Oberwaldschule, Grebenhain 36355

INTERESTS

- Development of mobile applications.
- Homelab & self-hosting, PC hardware.
- Sport: sport climbing & bouldering, calisthenics.

LANGUAGES

- German (Native)
- Ukrainian (Native)
- English (B2)
